

# Sheep Finger Painting Craft

## What you'll need:

- Piece of colored construction paper
- White paint
- Black construction paper
- Paper plate or cupcake liner
- Scissors
- Glue
- Googly eyes (optional)

## Directions:

1. Start by cutting out 4 strips of black paper for the legs.
2. Glue the strips onto the colored construction paper.
3. Pour white paint on a paper plate or in a cupcake liner.
4. Using your index finger, take a small amount of white paint and make a fingerprint on the colored paper. Continue with this technique until you have an oval formation.
5. Cut out a tail, head, and ears and assemble on the white fingerprint body.
6. Add googly eyes or create eyes using white paper.

## Ways to increase difficulty:

- Have the child work from the model, requiring the need to independently orient the pieces in the correct manner and perform the steps in the right order
- Allow the child to draw the legs, head, tail, and ears on their own
- Add a farm scene to the background of the sheep (i.e. barn, hay, other animals)

## Ways to decrease difficulty:

- Provide the black construction paper pieces cut out to eliminate the need for cutting
- Use a small sponge if the child is averse to fingerpaint
