

Galaxy Slime

Single Color Recipe

What you'll need:

- 8 oz. of Elmer's glitter glue of choice (black, blue, purple, or silver; clear can be used if desired)
- 1 tsp. baking soda
- 4 tsp. ReNu contact solution

Directions:

1. Combine glitter glue and baking soda in a bowl.
2. Add contact solution to the glitter glue and baking soda mixture.
3. Continue stirring until slime starts to form.
4. If the slime is still sticky, remove the slime from the bowl and begin to knead.
5. If using plain clear glue, add glitter to slime if desired.

Four Color Recipe

What you'll need:

- 2 oz. of Elmer's black glitter glue
- 2 oz. of Elmer's purple glitter glue
- 2 oz. of Elmer's blue glitter glue
- 2 oz. of Elmer's clear glitter glue
- 1 tsp. baking soda
- 4 tsp. ReNu contact solution

Directions:

1. Combine 2 oz. of glitter glue with $\frac{1}{4}$ tsp. of baking soda.
2. Add 1 tsp. of contact solution to the glitter glue and baking soda mixture.
3. Continue stirring until slime starts to form.
4. If the slime is still sticky, remove the slime from the bowl and begin to knead.
5. Repeat steps 1-4 for each remaining glue color.
6. When all 4 slime colors have been made, lay colors out side by side, as seen in the picture at the top of this sheet.
7. Pull and twist the slime to create a beautiful galaxy!

Ways to increase difficulty:

- Have the child measure out the ingredients independently.
- Have the child follow the recipe independently.

Ways to decrease difficulty:

- Have the ingredients pre-measured and ready for combination.
- Provide hand-over-hand assistance for pouring and stirring.
